BI Developer & Analytics Consultant

Akin Yavuz
BI Developer

- FULL ANALYTICS STACK
- POWER BI & TABLEAU
- DATA WAREHOUSING
- UK-BASED & R

What I do, and how I do *it well*

i.

Business Intelligence

Power BI and Tableau dashboards that surface what matters — built around the actual decisions your teams need to make, not what looks impressive in a demo.

ii.

Data Warehousing

Structured models and warehouse architecture that turn messy, siloed sources into a single reliable foundation. Built once, relied on daily.

iii.

Analytics Consultancy

Strategic guidance on tooling, pipelines, and reporting design. No jargon, no generic frameworks — just clear thinking applied to your specific problem.

Let's talk about your *data.*

Available for freelance and contract engagements across the UK. Remote-first, with on-site options for the right project.
