01 — Who I *am*

I'm a **Senior BI & Data Professional** with over a decade of experience turning raw data into dashboards, pipelines, and platforms that organisations actually use to make decisions.

My background spans the **NHS**, financial services (Openwork, Holloway Friendly), energy (Good Energy), and software consulting. I've built self-service BI systems for thousands of users, automated reporting workflows saving *40+ hours per month*, and delivered insight products to regulators including Ofgem and the Citizens Advice Bureau.

I'm equally comfortable writing a complex **SQL stored procedure**, designing a star-schema data warehouse, or presenting KPI frameworks to senior leadership. I hold a Certified Scrum Master qualification and have led teams in Agile environments across multiple industries.

Outside of data: I'm a **4× Commonwealth Games gold medallist** in powerlifting, a competitive coach, and an avid hiker. I bring the same discipline and attention to detail from sport into my work.

10+ Years in BI & Data	*50+* SSRS Reports Built

4× Commonwealth Games Gold

Powerlifting competitor at Commonwealth level. Discipline, structured training, and long-term goal-setting.

02 — Technical *expertise*

CORE BI & REPORTING

Power BI · DAX · Power Query (M) · SSRS · SSAS · Tableau · Excel

DATA ENGINEERING

SQL Server · T-SQL · SSIS · ETL / ELT · Azure Data Factory · Data Warehousing · Star Schema

CLOUD & DEVOPS

Azure · Microsoft Fabric · Dynamics 365 · Git / GitHub · Azure DevOps

LANGUAGES & TOOLS

SQL · Python · DAX · M / Power Query · VBA

LEADERSHIP

Agile / Scrum · Stakeholder Mgmt · Mentoring · Requirements Elicitation

SECTOR KNOWLEDGE

NHS / Healthcare · Financial Services · Energy / Utilities · Regulatory Reporting

03 — Where I've *worked*

Oct 2022 – Jun 2025

NHS Arden & GEM CSU

Principal Insight Developer

- Led Power BI best-practice standards across the department — consistent semantic model design and report governance for a national NHS commissioning organisation.
- Built KPI and performance frameworks to track healthcare outcomes, patient flow, staffing levels, and service efficiency for senior clinical and operational leaders.
- Designed self-service BI datasets enabling non-technical teams to build their own reports without depending on the data team.

POWER BI SQL AZURE DAX

Mar 2020 – Oct 2022

The Openwork Partnership

Senior MI Analyst

- Built 50+ SSRS reports automating manual processes — saving 40 hours of work per month across Finance and Operations.
- Built Power BI datasets sourced from an Azure Data Warehouse, embedded into Dynamics 365 for business-wide consumption.
- Authored complex SQL stored procedures supporting Finance with audit testing and regulatory compliance reporting.

POWER BI SSRS AZURE DWH DYNAMICS 365

Dec 2018 – Mar 2020

Good Energy

BI Developer

- Created Power BI dashboards for Ofgem, the Citizens Advice Bureau, and multiple government departments reporting on company finances and customer statistics.
- Led the data migration to a new CRM system, rewriting Power BI and SSRS reports to align with new data structures.

POWER BI SSRS REGULATORY REPORTING

Mar 2016 – Jun 2018

7 Layer Solutions

Report Developer

- Delivered Power BI dashboards for clients in Retail and Banking in a fast-paced Agile consulting environment.
- Travelled internationally to deliver Power BI training to enterprise client teams.

POWER BI AGILE CLIENT CONSULTING

05 — Projects & *work samples*

i.

● LIVE

Sanquhar Business Directory

Local business directory revealing a striking insight: 62% of 197 local businesses have no web presence. Built with data visualisation at its core — donut charts, category breakdowns, and live data.

DATA VIZ WEB APP DIRECTORY

ii.

● LIVE

Daily Duel

A competitive daily word game — similar in concept to Wordle but with multi-mode competitive scoring, leaderboards, and shareable daily challenge links.

POSTGRESQL AUTH / SESSIONS GAME LOGIC

iii.

● LIVE

Not An Octavia

Custom ML model trained on hand-curated second-hand car data to surface genuinely good deals — filtering noise from overpriced listings using price, mileage, condition, and market-rate comparisons.

MACHINE LEARNING PYTHON DATA SCRAPING

Let's talk about your *data.*
